Spread P \oplus int

Versatility is key to profitability and we know how all season work allows for greater returns. This is why we designed a purpose built salt, sand and grit attachment to fit your SP spreader. Allowing accurate and legal application of salt on highways, car parks, storage yards, commercial properties and any public space. Quickly change form your current spreading unit to this salt kit in 15mins and benefit from the rate control features from your current SpreadPoint spreader.

The spreading width can be changed from the cab by either setting the required disc speed or altering the hydraulic flow,subject to your spreader control system. Live feedback disc speed is also standard to ensure all is well and the correct width is set. Stainless steel construction means many years of corrosion free use.
