## Production Engineer/ Manager -- Full Time Permanent

Salary: £28,000 - £42,000

SpreadPoint is a new and innovative manufacturing company based in County Down, producing some of the most technologically advanced agricultural machinery in Northern Ireland.

We have an exciting opportunity for an individual to join our fast paced and expanding team forming its roots in new markets and innovative industries. We have experienced aggressive expansion over the past 18 months, and have exiting new plans in place to further grow the business. We are excited to offer this new role to an individual who can mould and grow within the business as it accelerates the design and production of its innovative technologies. This unique opportunity is reflective of our unique business model which strives to become a world player in spreading technologies.

### Job Description

Production Management of spreading and cop nutrition technologies

The Production Manager will be responsible for all production duties at SpreadPoint's new and advanced manufacturing HQ. Duties will include:

- Daily factory floor management
- Close collaboration with sales and admin team
- Organisation of purchase orders
- Implementing JIT goods in
- Responsible for the JIT performance to ensure seamless production
- Performing cost of production analysis
- Creating and implementing production schedules with close collaboration with sales
- Time to time customer interaction in relation to continuous improvement, new technologies and R&D projects
- Responsible for all production personnel in respect to training needs, H&S, and further development
- Responsible for all plant and machinery- maintenance, optimisation and further development with close correlation of capex budgets
- Monthly performance analysis and CPD

The individual will be expected to lead by example with extreme attention to detail, enthusiasm, with a can do approach to propel and sometimes keep up with the highly motivated and highly competent team already paving the way.

### Essential qualifications/ attributes

- Minimum 4 years manufacturing experience
- Minimum 2 years personnel management experience
- Minimum HND Manufacturing Engineering or equivalent
- Minimum GCSE Maths or equivalent
- High level IT skills including all Microsoft packages and knowledge of CAD/ CAN programs
- Ability to read and create engineering drawings
- Practical experience of manufacturing processes including sheet metal cutting and folding, modern welding techniques, and state of the art paint preparation and oven baking systems
- Full UK driving license or equivalent

### Desirable attributes

- Knowledge of Lean production techniques
- Knowledge/ experience of quality control measures

The successful candidate must approach all aspects with a professional manner however this is not a role for a corporate manager with no ground level interaction. The integration into the existing team is essential for success and accelerated knowledge transfer.
